

# Basic Hadoop Stack

10 questions

---

1  
point

1.  
What does SQOOP stand for?

- ☐ System Quality Object Oriented Process
  - ☒ SQL to Hadoop
  - ☐ Does not stand for anything specific
  - ☐ 'Sqoooping' the data.
- 

1  
point

2.  
What is not part of the basic Hadoop Stack 'Zoo'?

- ☐ Pig
- ☒ Horse
- ☐ Elephant

1  
point

3.

What is considered to be part of the Apache Basic Hadoop Modules?

- ☒ HDFS
- ☒ Yarn
- ☒ MapReduce
- ☐ Impala

1  
point

4.

What are the two major components of the MapReduce layer?

- ☒ TaskManager
- ☒ JobTracker
- ☐ NameNode
- ☐ DataNode

1  
point

5.

What does HDFS stand for?

- ☐ Hadoop Data File System
  - ☒ Hadoop Distributed File System
  - ☐ Hadoop Data File Scalability
  - ☐ Hadoop Datanode File Security
- 

1  
point

6.

What are the two majority types of nodes in HDFS?

- ☒ NameNode
  - ☐ RackNode
  - ☒ DataNode
  - ☐ BlockNode
  - ☐ MetaNode
- 

1  
point

7.

What is Yarn used as an alternative to in Hadoop 2.0 and higher versions of Hadoop?

Pig

- ☐ Hive
  - ☐ ZooKeeper
  - ☒ MapReduce
  - ☐ HDFS
- 

1  
point

8.

Could you run an existing MapReduce application using Yarn?

- ☐ No
  - ☒ Yes
- 

1  
point

9.

What are the two basic layers comprising the Hadoop Architecture?

- ☐ ZooKeeper and MapReduce
  - ☐ HDFS and Hive
  - ☒ MapReduce and HDFS
  - ☐ Impala and HDFS
- 

1  
point

10.

What are Hadoop advantages over a traditional platform?

- ☐ Scalability
- ☐ Reliability
- ☐ Flexibility
- ☐ Cost
